Subject: Quality System Approval—The Boeing Company

Reference: D1-9000 ®, Advanced Quality System ®

Dear Scott,

A quality system audit was completed at your facility April 24, 1998, including a review of all special capabilities necessary to develop and/or manufacture products for The Boeing Company ("Boeing"). The results of the audit and the completion of all corrective action, indicate that your company has a quality system capable of contract compliance; therefore, your quality system is approved per D1-9000, Basic Quality System (BQS).

This approval is based, in part, on your quality system documentation. You are required to transmit notice of any subsequent revisions to your quality system's documentation to the undersigned. This notification must include a summary of the change(s), a statement certifying continued compliance to D1-9000 requirements, and copies of such revised documentation. Implementation of such revisions, if required by an applicable Supplier Audit Report, is subject to prior approval by Boeing. In accordance with the referenced document, Boeing may disapprove any revisions that do not satisfy the referenced document.

This approval does not include or imply any authorization to perform the special processes controlled by Boeing Document D1-4426. Separate qualification and approval is required when processes controlled by Document D1-4426 are specified by Boeing.

The retention of this approval is contingent upon continued compliance with Boeing quality system requirements. This approval does not constitute a waiver of any inspections, tests, or other requirements of the contract, nor does it guarantee acceptance of the articles produced. This approval may not be reproduced for advertising or sales purposes, nor may this approval be used for the manufacture, sale, or shipment of any article to any company or individual other than Boeing without Boeing's prior written consent.

Questions regarding your quality system should be directed to the undersigned.

Sincerely,

Norman Pedersen
